## **What we do during a pet allergy rebalancing session**

**“If you were ever in that position, and I do not envy anybody who has been, you know how you feel when you have to give that pet back.”**

If you are like me, bringing a dog or cat into the family makes them a part of the family. I would tough it out even if I had allergy symptoms. The only time I would even consider giving the pet back is if my children were allergic to it. If you were ever in that position, and I do not envy anybody who has been, you know how you feel when you have to give that pet back. I mean, think of how the dog or cat must feel. They do not understand what is going on. Just as they feel more comfortable with their family, they are sent away. It really breaks my heart whenever I hear of this.

I implore you to listen to what I have to say. If any of you exhibit allergy symptoms towards any of your animals, just comb the hair at the back of the neck, above the tailbone and underneath the belly. You do not need a lot of hair either. You just need hair the size of a quarter. Then bring that hair into me and I will test it and potentially rebalance it from the family member(s). It may take two to three sessions for a dog and three to four sessions for a cat but you will only pay for the first two sessions for a dog and the first two sessions for a cat. The rest of the sessions are on us!

The results have been amazing! We boast an allergy rebalancing rate of 95%. So, having said that, why would

you not give us a try first?

As a further example, there was this man who all through his life could not be around dogs. His family wanted a dog so bad but he had to say no. Even going over to a friend's house, who owned dogs, would cause him to snuffle. His wife came in to see us first, for a totally unrelated issue, but it worked on her. So, after inquiring about our services, she decided to bring her husband in to see us regarding his dog allergies. After two sessions with us, he went back to that friend's house but this time with astonishing results. No sniffing, no sneezing, nothing at all. And to top it off, this allergy relief technique should be permanent too!

**Allergy Rebalancing – A four-step process...** In the next section, I will describe to YOU the four-step process for alleviating your allergy symptoms. It does not matter what it is that you are allergic to. We are so confident the process works, that we are willing to guarantee the results.

## **“The testing, the rebalancing and the confirmation!”**

Step 1: The testing.

Using a sophisticated computer system, we are able to test you for an infinite variety of items. The information (finger prints) of each item is digitally stored on this computer system. By attaching clips to both hands, the computer is able to send the information about each item to your body. It then records your body's responses and we print the results. Next it's on to step 2.

Step 2: Verification.

Based on the results we've obtained from step 1, we select from the computer the items to rebalance. After all items have been selected, we imprint a glass vial, filled with water and alcohol, with all of the items. With this vial, we are able to confirm

your body's sensitivity to the items via a simple muscle test. By putting the test vial, let's say it contains pollens, up against your arm and then holding your ring finger and thumb together tightly (see Figure 1), we will test your allergic reaction

**Figure 1**

to the substance contained in the test vial. In this test, the vial is held up against your forearm and we will try to separate your finger and thumb. If they do separate, then you have an issue with the substance, otherwise, you do not! It's that simple.

### Step 3: The elimination.

Connected to the computer is a special laser pen. We use this laser to transmit the information (finger print) of each item to your body using various acupuncture points. Note that there is no penetration of the skin by our laser. It is a painless procedure and is even safe for children! Also note that your body is doing the rebalancing—we're just the facilitator, helping to get things started and your body does the rest. The entire process takes approximately 15 minutes. Once completed, we go to step 4.

### Step 4: The confirmation.

In this step, we repeat step 2. Using the muscle test, your body should now test strong during the re-test. And that's it! The entire process for new clients runs around one and a half to two hours. Returning clients are often 30 to 45 minutes.

## “So what are YOU going to do?”

Now that you have the information, what are you planning to do about it? The average person has 40 allergy symptoms with or without them being aware of it. But now that I've given you some indication of what may constitute an allergic reaction perhaps I have done my job and you are aware of it. However, if you want to go one step further and you want to rebalance your body and alleviate your allergy symptoms, you can always find our telephone number by visiting our website at [www.noallergiesplease.com](http://www.noallergiesplease.com).

If they do separate, then you have an issue with the substance, otherwise, you do not! It's that simple.
