What we do during a seasonal allergy rebalancing session

“The sneezing and itchy eyes got so bad that I wouldn’t go outside for the months of May and June, two of the most beautiful months!”

Remember when we used to be able to go outside whenever we pleased? What on earth happened?

At around the age of 7, I was a young boy who came to Canada. I was so ecstatic with arriving at a new country that it was difficult to contain my excitement. Everything was going well, then at the age of 13 came my first sniffle. Then came my first full blown sneeze, and again, and again. My parents, not knowing any better, had surmised that this must be allergies and not a cold, especially for the amount of time that it lasted for – two months!!! Now, the non-drowsy formulas didn’t do anything for me and the drowsy formulas, oh they worked all right, they put me right out. The sneezing and itchy eyes got so bad that I wouldn’t go outside for the months of May and June, two of the most beautiful months, which were also my worst months. And my parents, not knowing what to do, just kept on with the allergy tablets. Every year my sneezing and itchy eyes got worse, not better, to the point where I would have to get up and excuse myself from company meetings and I even had to take days off of work because the allergy symptoms were that bad. I thought that this would be a matter of life living in Canada, that is, until my wife got a hold of this allergy symptom removal program. I latched on to this program and it has changed

my life. No longer do I hide out during the months of May and June, but instead, I enjoy the fresh breeze outside.

We have rebalanced many people from their environmental or seasonal allergies. Not only do we rebalance over 75 trees, over 45 grasses and over 75 weeds, but we do the outdoor mold, indoor mold, dust, sinuses and histamine. It is imperative that all nine sessions are performed because not only will you find relief from allergies but you will find that the nine sessions will be responsible for 50-100 percent of your intolerances or allergies.

It is only 50-100 percent if there are other allergens floating around in the air. But more commonly, your allergies will be reduced between 75-80 percent. And permanently too.

I remember this one client and she had terrible allergies all year long. Well, after rebalancing her she no longer reacts!

Allergy Rebalancing – A four-step process... In the next section, I will describe to YOU the four-step process for alleviating your allergy symptoms. It does not matter what it is that you are allergic to. We are so confident the process works, that we are willing to guarantee the results.

“The testing, the rebalancing and the confirmation!”

Step 1: The testing.

Using a sophisticated computer system, we are able to test you for an infinite variety of items. The information (finger prints) of each item is digitally stored on this computer system. By attaching clips to both hands, the computer is able to send the information about each item to your body. It then records your body’s responses and we print the results. Next it’s on to step 2.

Step 2: Verification.

Based on the results we've obtained from step 1, we select from the computer the items to rebalance. After all items have been selected, we imprint a glass vial, filled with water and alcohol, with all of the items. With this vial, we are able to confirm your body's sensitivity to the items via a simple muscle test. By putting the test vial, let's say it contains pollens, up against your arm and then holding your ring finger and thumb together tightly (see Figure 1), we will test your allergic reaction

Figure 1

to the substance contained in the test vial. In this test, the vial is held up against your forearm and we will try to separate your finger and thumb. If they do separate, then you have an issue with the substance, otherwise, you do not! It's that simple.

Step 3: The elimination.

Connected to the computer is a special laser pen. We use this laser to transmit the information (finger print) of each item to your body using various acupuncture points. Note that there is no penetration of the skin by our laser. It is a painless procedure and is even safe for children! Also note that your body is doing the rebalancing—we're just the facilitator, helping to get things started and your body does the rest. The entire process takes approximately 15 minutes. Once completed, we go to step 4.

Step 4: The confirmation.

In this step, we repeat step 2. Using the muscle test, your body should now test strong during the re-test. And that's it! The entire process for new clients runs around one and a half to two hours. Returning clients are often 30 to 45 minutes.

“So what are YOU going to do?”

Now that you have the information, what are you planning to do about it? The average person has 40 allergy symptoms with or without them being aware of it. But now that I've given you some indication of what may constitute an allergic reaction perhaps I have done my job and you are aware of it. However, if you want to go one step further and you want to rebalance your body and alleviate your allergy symptoms, you can always find our telephone number by visiting our website at www.noallergiesplease.com.

If they do separate, then you have an issue with the substance, otherwise, you do not! It's that simple.
